

**GOLD COAST CHINA – (07) 55970849**

## **Water Based Medium**

**A fine W Based Medium which in time dries very hard.**

**Excellent for penwork, airbrushing and can be used for applying solid colour.**

**Very good in a workshop situation as after it has dried hard, oil based products or lustres can be used next to or over the area painted with the W Based mix.**

**PENWORK – mix powder paint with medium to a thin toothpaste consistency, thin with water to a penning consistency.**

**A drop of water will need to be added to keep it to the penning consistency – as it will dry during use.**

**Penning with a Water based medium is a little more difficult than penning with a penning oil but it is an alternative for allergy sufferers.**

**APPLYING SOLID COLOUR – Mix to a workable consistency and paint solid areas of colour.**
